1	In schedule B of SSA, for newly advertised RTeS projects, a minimum data rate of 512 kbps has been mentioned. This constraint appears to be on higher side as PTA has set the minimum data rate to be 256kbps.	Keeping all other terms and conditions same, Clause 2(a) of Schedule B of SSA "Minimum Service Requirement" has been revised by reducing the minimum data rate requirements to 256kbps.
