

S.No	Queries	Document Ref:	USF Response
1	In Schedule C, population against mauza blocks 'Kappar' and 'Kappar1.1' is stated to be 110. Whereas, as per our tools there is no population at all. It is therefore requested that these mauza blocks are excluded from the requirements.	Schedule C of Draft SSA	"Kappar, Kappar1.1, Khor Kalamat & Khor Kalamat_1" are areas that were identified after complaint of locals. The population is confirmed by respective quaters. Thus these locations must be served.
2	Total population in Chandi Goth,Joz Goth and Khor Kalamat mauza blocks is 1,520. The addressable population will be even less. It is not possible to operate a sustainable site with such low population. It is therefore requested that either the mauza blocks are excluded from the requirements OR Opex subsidy is provided for the tenure of 10x years.	Schedule C of Draft SSA	All these locations have required mandatory population and must be provided coverage as per RFA. Opex subsidy is available for 3 years as per draft SSA.
