S.No	Queries	Document Ref:	USF Response
1	With reference to attached RFA against USF M-8 NH&MW project (NG-BSD/Lot10-M-8(Rato Dero to Gwadar)/2022), it is highlighted that the OPEX Subsidy to be granted as per the provided RFA is based on 3 Year Declining model as per Schedule D whereas OPEX Subsidy should be based on the 10 year static model similar to that of USF Tharparker Lot considering the hard terrain with considerable network maintenance challenges of the area	Schedule C of Draft SSA	It is to apprise that USF Board had sanctioned only three Pilot NG-BSD lots, excluding subject lot, to be tendered with 10 years OPEX model. 10 years OPEX in all future NG-BSD is not yet decided It is therefore advised to prepare your bids as per the current terms and conditions of the RFA.
2	As per the Schedule – D of the attached information package which is available on USF website for upcoming NG-BSD Lot-10 (M-8), OPEX subsidy will be given for 3 years in this project. However, the format of subsidy proposal form given in Annex 1 of RFA, only CAPEX subsidy must be claimed.	Annex-1 of RFA	Opex subsidy is included. The updated information package, with revised Annex-1 of RFA, will be sent to registered bidders and posted on webiste.
