Introduction

1. Purpose of the RFA Process

- 1.1 All telecommunications licences issued by the Pakistan Telecommunications Authority (“PTA”) subsequent to the De-Regulation Policy 2003 and the Mobile Cellular Policy 2004 provide for contribution by licensees to a Universal Service Fund (“USF”).
- 1.2 The purpose of this Request for Applications (“RFA”) is to invite holders of such licences (“USF Contributors”) to submit Proposals, either individually or as part of a consortium, for providing voice telephony and Broadband Internet services, including access networks (“USF Services”), to defined areas (“USF Areas”) in Pakistan pursuant to a 10 year USF Services and Subsidy Agreement.
- 1.3 This RFA is part of a universal service program initiated by the Government of Pakistan (“GoP”), which is aimed at increasing access to telecommunications networks and services in un-served and under-served areas of Pakistan in a manner consistent with fair competition, international best practices, and existing sector policies and GoP commitments.
- 1.4 GoP has created a not-for-profit federal Government owned and controlled Universal Service Fund Company (“USFCo”) to administer the USF, including the process initiated by this RFA (“RFA Process”). It is GoP’s intent that USFCo apply part of the USF toward payment of subsidy (the “USF Subsidy”) to be paid pursuant to the USF Services and Subsidy Agreement to assist in meeting the costs of constructing and operating the USF Network in the USF Areas.
- 1.5 Further information on the proposed USF Services, USF Network and USF Areas is set out in this RFA.
- 1.6 It is the intention of GoP to act quickly to implement its policy of extending access to telecommunications networks and services in un-served and under-served areas in Pakistan.

2. Source of Funds

- 2.1 Pursuant to Section 33A of the Act, the sources of funding USF shall consist of
 - (a) grants made by the Federal Government and the Provincial Governments;
 - (b) prescribed contribution by licensees;
 - (c) sale proceeds from the auction of the right to use radio spectrum;
 - (d) loans obtained from the Federal Government; and
 - (e) grants and endowments received from other agencies.

2.2 Left Blank

2.3 Left Blank

3. Current Legal, Regulatory, and Market Regime

- 3.1 Before 1996, Pakistan's telecommunications markets were governed by the Telegraph Act, 1885 and Wireless Telegraphy Act, 1993. Most telecommunications services were provided by the GoP's Telegraph and Telephone Department. That Department was converted into a statutory corporation in 1990 as the Pakistan Telecommunication Corporation ("PTC") and later in 1996 it was converted into a public limited company Pakistan Telecommunication Company Limited ("PTCL"). Competitive mobile telephone service was launched in 1991. Payphone service was launched in 1993. But of these competitors, only PTC and then PTCL had a formal duty to serve cities, towns, villages and Mauzas in all areas of Pakistan.
- 3.2 Additional mobile, Wireless Local Loop (WLL), fixed-line Local Loop ("LL") and Long Distance International ("LDI") licensing since 2004 has increased competition substantially. Use of telecommunications services has expanded rapidly in this increasingly competitive environment.
- 3.3 The Mobile Cellular Policy (2004) and Pakistan Telecommunications (Re-organisation) (Amendment) Act, 2006 require that PTCL and all mobile licensees provide significant geographic coverage. Yet, in rural areas, teledensity and Broadband Internet penetration is significantly lower than the urban areas. Making telecommunications services available country-wide is a GoP priority.
- 3.4 In a competitive sector, it is not appropriate to impose universal service obligations on a single operator. Accordingly, the De-Regulation Policy (2003) at section 5, the Mobile Cellular Policy (2004) at section 8, and the Pakistan Telecommunications (Re-organisation) Act, 1996 at section 33A require that PTCL and all subsequent fixed and mobile licensees pay into the USF.
- 3.5 Persons who enter into a USF Services and Subsidy Agreement as a result of the RFA Process ("USF Service Providers") will receive a subsidy payment from the USF to extend telecom services (Including broadband internet services) by using Renewable Energy Solutions as a source of power, to rural areas, increasing rural teledensity and broadband internet penetration. The amount of the USF subsidy payment will be established in accordance with sections 12 and 43 of this RFA. The subsidy payment will be made in one or more installments in accordance with the USF Services and Subsidy Agreement.
- 3.6 In addition to the Capex Subsidy, USF shall also provide "Opex Subsidy" for a maximum period of up to three years on a declining model basis (see 3.8 below). USF Opex Subsidy shall be payable on regular periodical basis starting from completion of each of the milestones as mentioned in Schedule D of USF Services and Subsidy Agreement.
- 3.7 USF will only be looking for the lowest bidder overall Subsidy (Capex + Opex), and not breakup of USF OPEX Subsidy demanded.

- 3.8 All Applicants shall mention a lumpsum amount of Opex for three years (separately from the usual Capex Subsidy) in their Financial Proposal in appropriate field. This amount shall be equally split over three years to show “Yearly Opex” of the Applicant. Then the Applicant in adjacent column shall mention the “Yearly Opex Subsidy” for each of the three years making sure that for first year the asked subsidy amount cannot exceed 75% of the “Yearly Opex”, for second year the asked subsidy amount cannot exceed 50%, and for third year the asked subsidy amount cannot exceed 25% (See Annex 1: USF Subsidy Proposal Form with this RFA for elaboration).
- 3.9 USF OPEX Subsidy for each of the Years i.e. One, Two and Three shall be paid in quarterly installments based on the audited BTS sites in each Milestone. The quarterly installments shall start immediately after completion of each of the Milestones and issuance of Project Implementation Milestone Certification. The payment will be due after verification of Quarterly Reports submitted by SP in accordance with Section 9.01 of USF Services and Subsidy Agreement and in accordance of Schedule of the OPEX Payment Methodology in the following manner:
- (a) After completion of the First Milestone and issuance of Project Implementation Milestone Certification and verification of Quarterly Reports as per OPEX methodology, USF Service Provider shall be paid as quarterly installments of the First Year OPEX Subsidy for the number of audited BTS sites in the First Milestone. Second and Third year OPEX subsidy for the First Milestone shall be paid to the service provider in the same manner. Thus, over a period of three years (thirty-six (36) months), against First Milestone, USF Service Provider shall be paid twelve (12) quarterly installments in accordance with the number of BTS sites audited for the Milestone.
 - (b) Same process of payment of OPEX Subsidy shall be repeated for each subsequent Project Implementation Milestone, thus USF Service Provider shall get forty-eight (48) installments covering entire amount of OPEX Subsidy for the Project.

4. USF Policy

- 4.1 The Universal Service Fund Policy (“USF Policy”) is the policy framework guiding the RFA Process. It sets out goals, objectives, and guidelines for using USF funding to meet certain basic telecommunication and ICT services needs in areas of Pakistan which would otherwise remain un-served.
- 4.2 The USF Policy’s goals include making voice telephony and Internet access data services available and affordable to progressively greater proportions of Pakistan’s rural population.
- 4.3 USF Policy goal (as per Telecom Policy 2015) is “Available and affordable telephony and universal Broadband access to enable e/m services for covering under served and unserved population”. This RFA and similar USFCo initiatives are intended to meet these objectives by introducing service in defined USF Areas.
- 4.4 The USF Policy will guide the actions of USFCo in administering the Universal Service Fund. That administration includes the use of the USF Services and Subsidy Agreement, with compliance monitoring and penalties for non-performance, including

forfeiture of bank guarantees. Technological features of the USF Policy include technological neutrality, an emphasis on shared access points, and mandatory infrastructure sharing to facilitate multiple operators in the same area. Economic features include capping USF service prices at nationally available retail prices, and a “negative auction” RFA Process to use bidding competition among licensees to minimize the amount of any particular USF Subsidy, and to maximize overall benefits from the fund. Together, these features establish a USF regime to extend telecommunications services (including Broadband Internet services) to rural locations in a sustainable manner consistent with fair competition.

5. USF Coverage Requirements

The geographic locations that are the subject of this RFA and related USF Subsidy (the “USF Areas”) are identified in detail in Schedule C of the USF Services and Subsidy Agreement enclosed as Annex 6. Applicants must demonstrate that the proposed USF Networks and Services provide service coverage to all of the mandatory cities, towns, villages or mauzas as identified in Schedule C of the USF Services and Subsidy Agreement.

6. USF Service Requirements

The service requirements to be met by the successful Applicant selected pursuant to this RFA are identified in Schedules A and B of the USF Services and Subsidy Agreement enclosed as Annex 6.

7. USF Contributors and Eligibility

7.1 Persons whose Local Loop (“LL”) Wireless Local Loop (“WLL”), Long Distance and International (“LDI”) or Telecommunication Infrastructure Provider (“TIP”) Licence was issued after adoption of the Deregulation Policy (2003), and persons whose mobile cellular licence was issued or renewed after adoption of the Mobile Cellular Policy (2004), (collectively, “USF Contributors”) have an obligation to contribute 1.5% of annual gross revenues to the Universal Service Fund, less inter-operator fees and related payments mandated by the PTA or Frequency Allocation Board (“FAB”).

7.2 Any other licensee who has had its licence issued, re-issued or amended to include Universal Service Fund contribution payment requirements will, on satisfaction of those requirements, be recognized as a USF Contributor as well.

7.3 Eligibility to participate in the RFA process is limited to USF Contributors under the Universal Service Fund Rules, 2006 (the “Rules”)1.

7.4 Rule 24(12) sets out the following further restriction:

No single licensee may accumulate more than fifty per-cent of the total amount of USF subsidies awarded by the USF Company in multiple auctions. The period during which a licensee’s accumulation and proportion of USF subsidy

¹See Rule 24(12) of the USF Rules 2006 as amended.

amounts will be defined in guidelines or statements of auction procedures to be issued by the USF Company from time to time.

Detailed guidelines to Rule 24(12) are available at USF website www.usf.org.pk.

8. Tentative Time Schedule

8.1 The tentative timetable for the RFA events, beginning with publication of the pre-auction notice, is set out in Annex 8 of RFA.

Methodology for NG-BSD OPEX subsidy confirmation

1. Preamble

The objective of this document is to present the Monitoring Methodology for OPEX disbursement to verify that Service Providers (SPs) are meeting their contractual obligations of USF Services and Subsidy Agreement (SSA) regarding OPEX claim.

Schedule D of the SSA defines payment mode for OPEX subsidy.

2. Methodology for OPEX Subsidy disbursement

Service Provider's (SP) NOC/ BSC will be visited along with SP representative to obtain the required NOC data mentioned below, directly from NOC terminal/ element management system (EMS). NOC data will be collected from SP NOC on monthly basis, for all USF sites, based on KPI's mentioned in Article 9 of the SSA signed between USF and SP.

NOC data which will be collected and analyzed. This will include:

- a) System generated reports and analysis:
 - Unplanned downtime events of USF BTS Availability.
 - TCH Availability and Traffic on USF BTS sites on an hourly basis for each day of the quarter. The required data to be in terms of Erlangs. Other formats should be intimated to USF Company and a prior approval be taken before submission of data.
- b) A field visit may also be carried out if required to verify the network statistics.
- c) Non-provision of the required data in required format in any of the subsequent quarters will result in a corresponding payment deduction.

2.1. System generated logs for calculation of downtime

The Service Provider shall ensure that system generated data portraying downtime status of all USF BTS sites pertaining to the Milestone of the quarter for which OPEX subsidy is being claimed is provided to USF in time.

These reports shall include BTS Availability on hourly basis for which outage duration of the OPEX quarter in question would be calculated based on BTS availability data. All system generated data is to be saved monthly on the 25th of the Calendar month and archived and made available and accessible during the quarter in question and thereafter for a period of thirty-six months, till validity of OPEX subsidy duration.

2.2. OPEX Subsidy Deduction Calculation

2.2.1. Without FM Scenario

In case the cumulative unscheduled downtime of USF site exceeds four (04) days in a quarter for which the OPEX Subsidy is being given, USFCo shall be entitled to deduct proportionate amount on per day per site basis, on number of days exceeding four (04), from the current installment of OPEX Subsidy and/or part thereof from the OPEX subsidy as the case may be for outage period exceeding 4 days in that quarter. The method of calculation of per-day per site OPEX Subsidy shall be to divide the OPEX Subsidy of that quarter by the total number of sites and then by the number of days in that quarter.

The method for calculating the number of outage days per site in a quarter is given below:

$$\begin{aligned}\text{Per Site Outage Days} &= \frac{\text{Total Outage Minutes of a Site}}{24 \text{ Hours} \times 60 \text{ Minutes}} \\ \text{Per Site Per Day Cost} &= \left(\frac{\text{Total OPEX subsidy of a Quarter}}{\text{Total number of USF Sites in Milestone}} \right) / \text{No of Days in Quarter} \\ \text{Per site Deduction} &= \text{Per site outage days exceeding 04} \times \text{Per Site Per Day Cost} \\ \text{Total Deduction} &= \text{Sum of per site deduction for all USF sites}\end{aligned}$$

2.2.2. With FM Scenario

In case there are certain sites which become partial accessible or completely inaccessible, due to reasons mentioned below, for certain period of the OPEX quarter, then the outage minutes resulting from this inaccessibility, will be excluded from OPEX subsidy deduction based on formula mentioned in this section. The reasons of inaccessibility include:

- a. Areas which become inaccessible due to weather i.e., snowfall, rain and land sliding. This will be verified from District Administration/relevant authorities. In case the verification is not done through district administration, NDMA certification shall be used. The responsibility of getting inaccessibility certificates will lie on USF Service Provider.
- b. Areas which become inaccessible due to Law-and-order Situations. This will be verified from District Administration/relevant authorities. The responsibility of getting inaccessibility certificates will lie on USF Service Provider.

In case the cumulative unscheduled downtime of USF site, based on outage minutes not claimed under FM/inaccessibility, exceeds four (04) days in a quarter for which the OPEX Subsidy is being given, USFCo shall be entitled to deduct proportionate amount on per day per site basis, on number of days exceeding four (04), from the current installment of OPEX

Subsidy and/or part thereof from the OPEX subsidy as the case may be for outage period exceeding 4 days in that quarter.

The method of calculation of per-day per site OPEX Subsidy shall be to divide the OPEX Subsidy of that quarter by the total number of sites and then by the number of days in that quarter.

$$\begin{aligned}
 \text{Per Site Outage Days} &= \frac{(\text{Total Outage Minutes} - \text{Inaccessible outage minutes})}{24 \text{ Hours} \times 60 \text{ Minutes}} \\
 \text{Per Site Per Day Cost} &= \left(\frac{\text{Total OPEX subsidy of a Quarter}}{\text{Total number of USF Sites in Milestone}} \right) / \text{No of Days in Quarter} \\
 \text{Accessible Per site Deduction} &= \text{Per site outage days exceeding 04} \times \text{Per Site Per Day Cost} \\
 \text{Total Deduction} &= \text{Sum of per site deduction for all USF accessible sites}
 \end{aligned}$$

2.3. System generated logs showing sector wise traffic carried by BTS

Sector wise TCH Traffic recorded on hourly basis on all USF BTS sites for which OPEX subsidy is being claimed shall also be submitted by the Service Provider. All system generated data is to be saved on the 24th of the Calendar month and archived on a Server and made available & accessible during the quarter in question and thereafter for a period of thirty-six months, till validity of OPEX subsidy duration.

Deductions in OPEX subsidy shall be calculated on the basis of system generated reports for the OPEX duration as given in Schedule D of the SSA.

2.4. Inspection of Nodes

Service Provider (SP) shall provide monthly data of OFC Nodes installed by SP for which capex subsidy is being claimed or OFC nodes visited during Technical Audit for the acceptance of the Project Implementation Milestone.

Monthly data of OFC Nodes shall contain following:

1. Installed OFC pairs and number of lit pairs
2. Alarm Generated
3. Bandwidth Utilization Graphs of Fiber links

If required, a separate visit to the NMS and sample of these nodes may also be conducted. The following would be checked at these nodes:

- Verification of operational status.
- Ensuring that there are no service affecting alarms on the nodes.

2.5. BSC / NOC Visit

BSC / NOC visit will be conducted at the end of Technical Audit of a Milestone or Monitoring visit.

- Operational status of USF BTS sites, TXN Repeaters, OFC Nodes etc. and alarm status shall be checked.
- If major alarms exist, these shall be conveyed to the Service Provider who shall rectify these alarms and send a report to USF.
- These snags shall be checked during subsequent monitoring visits.

3. Reporting

OPEX quarter will start immediately after completion of each of the Milestone and issuance of Project Implementation Milestone Certification. Once the OPEX quarter is due, OPEX quarterly report shall be submitted to USF within 30 days of quarter due date. Report shall contain data mentioned in section 2 above and Article 9 in RFA. In case any outage minutes are claimed under FM/sites inaccessibility, they shall be clearly mentioned in the report together with the duration and inaccessibility certificates validated by District administration/ relevant authorities.
