<b>S. No.</b>	<b>Queries</b>	<b>Document Ref:</b>	<b>USF Response</b>
1	SP has observed in the KMZ that USF has shared “USF Deployed Nodes” for the Attock Lot, whereas previously they shared “Proposed Nodes/Served Nodes,” which are not included in the current KMZ. Please clarify whether these “USF deployed nodes” can be considered as “proposed nodes” .	Schedule C of SSA	It is clarified that the nodes labeled as “USF Deployed Nodes” in the Attock Lot KMZ represent already deployed infrastructure and should not be considered as “proposed nodes.” Since this lot is primarily aimed at village connectivity, the Service Provider (SP) may extend connectivity to the target villages either from these deployed nodes or from any other technically feasible node within the project area, based on their network design.
2	Within the USF-defined boundary of Lot-39V (Gujranwala), work has already been completed on Jazz-owned towers out of the total requirement of 304 BTS sites. To fulfill the remaining USF requirement, coordinates/details of CMO sites are required for their inclusion in the scope. USF support is requested in this regard.	Schedule C of SSA	Please refer to USF response of query 2 of query set 6.
